

The traditional home porch conjures up images of afternoon checker games, fresh lemonade in icy glasses and long naps in the sun. To make these favorite American pastimes more enjoyable, Fypon has teamed up with designer William E. Poole to offer a collection of low-maintenance products that encourages an easy lifestyle with plenty of time to create lazy memories.

The headaches of peeling paint, rotting wood trim and insect infestations melt away with the William E. Poole Collection by Fypon.

While the traditional beauty of ornate mouldings and millwork is captured in each detailed piece of synthetic Fypon product, the difficulties of constant maintenance are eliminated.

Impressive Home Accents

“This is the best marriage I’ve ever seen of state-of-the-art technology and design,” according to designer William E. Poole. “I’ve created hundreds of elegant, Classic-style homes over the years. I’m excited about the historical accuracy in these pieces combined with true beauty and durability.”

Within the William E. Poole Collection by Fypon, homeowners, builders and remodelers can find an oasis of decorative interior pieces and Mouldings. To transform the exterior of the home, Poole has designed a selection of Balustrade Systems, Window and Door Trim, Cupolas, Louvers, Gable Vents and Cornices. A unique three-piece Dormer Façade draws attention to the top portions of the home, while pre-assembled Compound Curve Baluster Kits for descending stairways invite the hand to linger on a smooth, classic railing.

With an architectural design range that encompasses styles from Southern Classic to New England Colonial and Victorian to Italianate, the homes created by William E. Poole combine classic grace with timeless solidity. Pieces in the William E. Poole Collection by Fypon complement these home designs while working together to add dimension and style to homes designed by Mr. Poole.

“Our designs are all about making a house into a home,” says Poole. “The Fypon products are an integral part of enjoying your home. Worry-free days spent on the front porch or relaxing indoors are far more preferable than constantly painting and repairing your home. These Fypon pieces have transformed my design ideas into impressive accents for the home.”

Impervious to rot, decay, insects and warping, synthetic Dormer Kits, Modillion Cornices and Balustrade Systems in the William E. Poole Collection by Fypon have rich detail and are easy to maintain.
